

Light, Stills, Emotion- Photolanguage Cards

Young women designed these cards with specific reflection and understanding of relationship issues.

Photolanguage cards are a useful tool to stimulate discussion in group or individual settings with an education or therapeutic goal.

The Light Stills Emotions photography project was a joint partnership between Liverpool Women's Health Centre, Green Valley Domestic Violence Service, Fairfield Liverpool Youth Health Team and young women in the Liverpool area of Sydney in 2006. It was funded by the NSW Office for Women.
